- Tech company pitches
- Selection and due diligence

PILOT

- Pilot with tech company
- Utilise Proof of Concept Fund
- Business case for deployment

OUTCOMES

- Learnings
- Change
- Deploy
- Promotion

- ▶ **Our experienced Safetytech Accelerator team, supported by world class experts at Lloyd's Register, are perfectly placed to help you discover and map your tech-enabled innovation opportunities in safety and risk management.**

Our workshops have led to many positive outcomes for our clients, such as establishing a foundation for developing a targeted innovation or change initiative, new technology partnerships and innovation pilots.

Your commitment

Depending on your requirements, the workshop or workshop series could be online, in-person or a combination. You bring as many people as you require, to suit the breadth of operations and the culture of your organisation. This could be between anything between 3 and 20 people.

The senior attendees should be able to cover for instance a mix of Assets, People, Operations, Health and Safety and Sustainability (ESG). We can advise you on this.

We will guide you on what preparation may be required to maximize outcomes. If you have completed a review of safety and risk processes recently, or have pressing priorities that you'd like to bring, we will advise you to share them with us in advance.

Lloyd's Register is one of our trusted and most valuable partners and we always receive high quality input from them. We're really grateful for the opportunity to meet and work with world-class startups through the Safetytech Accelerator."

Yiannis Sykas,

Director of Strategy and Product Development,
Bernhard Schulte Shipmanagement

Workshop structure

A discovery workshop would have the following steps

- Shared understanding of the discovery process and objectives
- Key safety and risk technology enablers
- Facilitated issue identification across the organisation
- Exploring technology options to solve issues
- Initial assessment/prioritisation (Impact, Feasibility, Alternative)

The outcome of a discovery workshop with us is a prioritised set of safety and risk challenges that can be solved with digital technology.

What you get out of your engagement with us

- You will develop a clear understanding of how emerging digital tech can help your organisation, with actionable insights on how to start working in this direction.
- We will work with you to develop a prioritised set of innovation opportunities to improve safety and risk management in your organisation, and a clear understanding of which technologies can be used.
- If you'd like to explore the opportunities to innovate in safety and risk in your organisation, please contact us.
