

LIFE FINDER

SOLUTION DETAILS:

LifeFinder is an Intelligent IoT alarm system that enables life saving solutions that integrate into workers everyday life and enhance existing safety by detecting and alerting to danger and life-threatening situations.

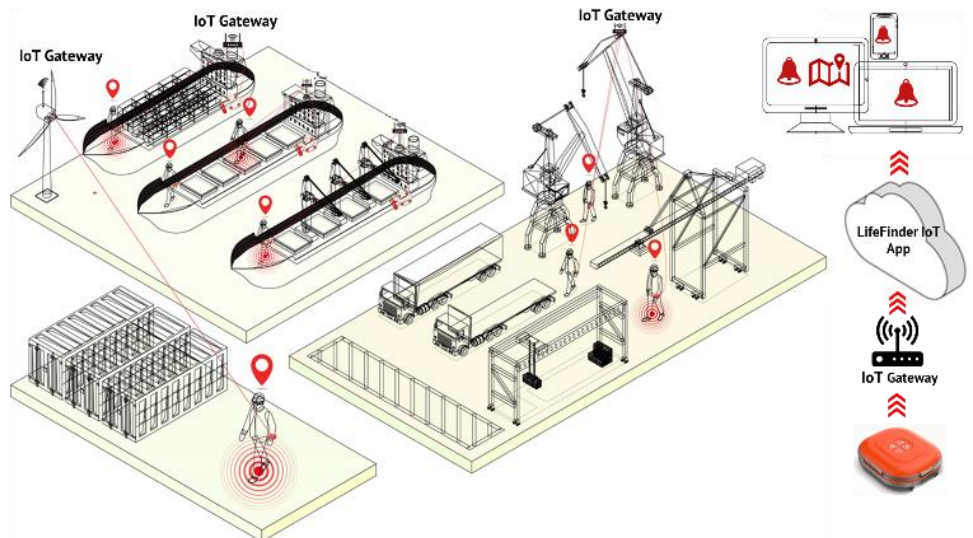

A LifeFinder device is comprised of intelligent sensors that detect abnormal conditions such as man overboard or man down. As an example, in case of a fire or evacuation everyone can be located, and assistance incidents can be avoided.

The small device has a +5 year battery life that can easily be used as a wearable or integrated into workwear and equipment. The alarms are transmissible long range +10 km and works inside vessels with complex steel structures and no need for mobile networks.

Waypoint 4 Nearshore Solution:

The solution has a strong safety and risk-mitigating impact on shipping operations, especially with regards to enclosed-space entries and rescue operations. It can easily be integrated with PPE, with no need for additional wearable. Commercially speaking, they are a good solution for shipping companies that recorded incidents and fatalities.

Would you like to run a pilot with this company? Please contact Safetytech Accelerator to find out more: info@safetytechaccelerator.org

Founded:	2018
Website:	Lifefinder
Employees:	5
HQ Country:	Sweden
Primary industrial sector:	Marine
Paying clients:	First Responders
Business model:	Direct sales/partnerships with PPE distributors and Integrators Safety as a Service
Pilots:	Maersk Tankers, Evergas, Swedish and Dutch First Responders

About Safetytech Accelerator

Safetytech Accelerator is a non-profit established by Lloyd's Register. It is the first fully dedicated technology accelerator focused on safety and risk in industrial sectors. Our mission is to make the world safer and more sustainable through wider adoption of safetytech.
